Professional Summary

Fourth-year Software Engineering student at ESI with a proven track record of delivering 10+ production-ready web solutions for international clients. Specialized in building scalable back-end architectures with a focus on high-performance cloud infrastructure.

Technical Skills

Languages: JavaScript, TypeScript, Go, C, Python

Frontend: React, Next.js, HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js, NestJS, RESTful APIs, GraphQL, Webhooks, WebSocket

Backend as a Service: Supabase, Firebase

Databases and ORMs: PostgreSQL, MySQL, MongoDB, Prisma, TypeORM

Caching & Messaging: Redis, RabbitMQ, Kafka

Cloud & DevOps: AWS, DigitalOcean VPS, Cloudflare, GitHub Actions, Jenkins, PM2

Security: OWASP API Security Top 10, JWT, OAuth2, RBAC

Version Control: Git, GitHub

Testing & Developer Tools: Jest, Postman, GitHub Copilot, Claude AI

Professional Experience

Freelance Software Engineer

2024 – Present

Remote (International Clients)

- Delivered 10+ web solutions with a 5-star client rating.
- Migrated monolithic apps to scalable Node.js/NestJS architectures with Docker.
- Khamsat Reviews

Software Engineering Intern – Algeria Telecom

2025

Full-Stack Developer

- Built a centralized Complaint Management System using NestJS and React.
- Automated reporting workflows and optimized database schema.

Projects

National Repossession Platform – USA

- Built full-stack platform with Next.js frontend Node.js/Express and MongoDB backend.
- Managed vehicles, owners, agents with secure REST APIs.
- Implemented real-time notifications and messaging using WebSockets (Socket.io) and admin dashboards.
- Applied RBAC, JWT, and API security best practices.

Reservation System – Party-Time – Germany

- Built event reservation platform with React and Supabase.
- Integrated Stripe SumUp payments, handling webhooks for asynchronous transaction processing.
- Implemented QR code check-in system and notifications (email/WhatsApp).
- Automated reporting for analytics, attendance, and revenue.
- Automated deployment workflows via CI/CD pipeline on AWS, reducing deployment time from hours to 10 minutes.

ATMs Route Optimization – Saudi Arabia

- Developed full-stack route optimization platform using Next.js + Node.js.
- Created microservices for route calculation (Python + ORS).
- Reduced average route distance by 15% through a custom Python/ORS microservice.
- Containerized application with Docker on AWS, ensuring 99.5% uptime for critical operations.

WeTransfer-Like File Transfer – Saudi Arabia

- Built secure file transfer platform handling 10GB+ files .
- Scalable backend with secure storage, access control, and streaming.
- Built admin dashboards for monitoring transfers and usage.
- Deployed on DigitalOcean VPS using PM2.

Education

Software Engineering Degree (4th Year)

2022 – Present

National Higher School of Computer Science (ESI), Algeria

Languages: Arabic (Native), English (Professional), French (Professional)
